

Top 10 threats to humanity from other humans, that need to be addressed on a Planetary basis, as sovereign nations are more likely to fight over these issues than work cooperatively to solve them

- 1. Nuclear War**
- 2. Climate Change (Global Warming)**
- 3. Ocean Acidification**
- 4. Pollution of the Oceans (Plastics, Chemicals, Oil)**
- 5. Loss of Biodiversity (Mass Extinction)**
- 6. Loss of Potable Fresh Water**
- 7. Air Pollution**
- 8. Global Pandemics (Naturally Emerging or Engineered)**
- 9. Artificial Intelligence Misuse or Loss of Control**
- 10. Large-Scale War and Political Instability**

Some Cross-Cuttingting Meta-Threats to our species

- Extreme inequality**
- Resource depletion**
- Disinformation and erosion of democratic institutions**
- Nationalism and breakdown of international cooperation in every country**
- Short-term economic incentives overriding long-term survival**

Some Issues that need to be addressed on a Planetary Basis

- Stop the killing of human beings that is preventable and avoidable from all causes**
- Stop corruption, everywhere at all levels**
- Free and fair elections everywhere**

- **Redefine National Sovereignty so that it does not include the right to kill people or take a nation to war**
- **50 million human beings in 2026 are in some form of modern slavery such as debt bondage, child or forced marriage or human trafficking**
