

## **Vision for the Future**

### **A Better Future Is Possible**

Humanity has entered a period of extraordinary danger and extraordinary opportunity.

For the first time in history, we possess the technological and scientific capability to:

- Feed the entire human population.
- Prevent many diseases.
- Communicate instantly across the planet.
- Cooperate globally.
- Expand knowledge and education.
- Reduce poverty.
- Protect human rights.

Yet humanity also faces severe threats:

- Nuclear war
- Environmental collapse
- Authoritarianism
- Mass disinformation
- Corruption
- Economic instability
- Political extremism
- Resource depletion

The future depends upon which path we choose.

### **What a PFJF Future Looks Like**

In a PFJF future:

- War is increasingly replaced by diplomacy and international law.
- Human rights are protected in all countries.
- Governments are transparent and accountable.

- Elections are free and fair.
- Children have access to education.
- Hunger and preventable disease are dramatically reduced.
- Freedom of thought and belief are protected.
- Science and evidence guide public policy.
- Minority rights are respected.
- The environment is protected for future generations.
